

Safer Internet Day in Croatia

February 11, 2020

Today is World Safer Internet Day.

Web detectives were active in our school.

Who are Web detectives?

Web detectives are the pupils of our school who are educated for recognizing and reporting inappropriate contents on the Internet. They surely give their support to use this great and powerful medium of the Internet, but we have to be responsible and careful. They started working at the beginning of 2017 and have been actively involved in stopping all types of verbal violence among their peers, especially cyberbullying since then. They are aware that cyberbullying has become a modern method of bullying where the victim stays permanently hurt and therefore they want to help younger generations.
